SAS Platform Administration 9： 2

SAS Clinical Trials： 17

SAS Statistical Business Analyst Using SAS 9： 2

※As of June 2024

Our Clients

■ Our Clients （the previous five years）:

Medical/Pharmaceutical：58 （Pharmaceutical：33, CRO：25）

Financial Services：8 (Banking：2, Insurance：5, Credit Card：1）

Government：3 （National Facility：2, Local Govt.：1）

Manufacturing/Distribution：9 (Manufacturing：8, Distribution:1）

Information & Communications：20

Education/Hospital：19 （University:14, Hospital:5）

Others:16

Services

Support for Drug Development

CDISC Consulting Services and Solutions

Leveraging our extensive expertise, we provide high-quality services across all stages of drug development—from comprehensive clinical trials to investigator-initiated studies—with flexible support tailored to your needs.

Non-Clinical Studies	Clinical Development	Post-Marketing Surveillance

Services – Drug Development

Non-Clinical Services

Business Services

- SEND Creation Support
- SEND Data Quality Checking
- Statistical Analysis & Consultation

IT Services

Takumi	XPT Compare	: Support editing and checking of SEND data
Takumi	Stat PreClinica	: Perform statistical analysis with simple mouse clicks
Takumi	SENDVT	: JMP Add-in Tool for Visualizing SEND Data
	JMP	: Add-on development support services
	nQuery	: Typical software for sample size determination
	solas	: Software for simulation of missing data

Services – Drug Development

Clinical Development

Business Services

- Data Management
- CDISC Electronic Application Support Service
- CDISC Consulting Service
- Statistical Analysis
- EDC Development & Operations

IT Services

Takumi	Takumi Macro Series	: Support report creations
	Viedoc	: EDC used in any clinical trial areas & phases
	JMP	: Add-on development support services
	nQuery	: Typical software for sample size determination
	solas	: Software for simulation of missing data

# Services - Drug Development

Post-Marketing Surveillance

Business Services

- Data Management（Clinical Trial / Post Marketing）
- Electronic Data Capture (EDC) system development and operation
- Statistical Analysis

IT Services

Takumi Macro Series	: Support report creations
Viedoc	: EDC used in any clinical trial areas & phases
JMP	: Add-on development support services
nQuery	: Typical software for sample size determination
solas	: Software for simulation of missing data

Services – Drug Development

Database Research

Business Services

Statistical Analysis（DB：MDV, JMDC, various RWD）
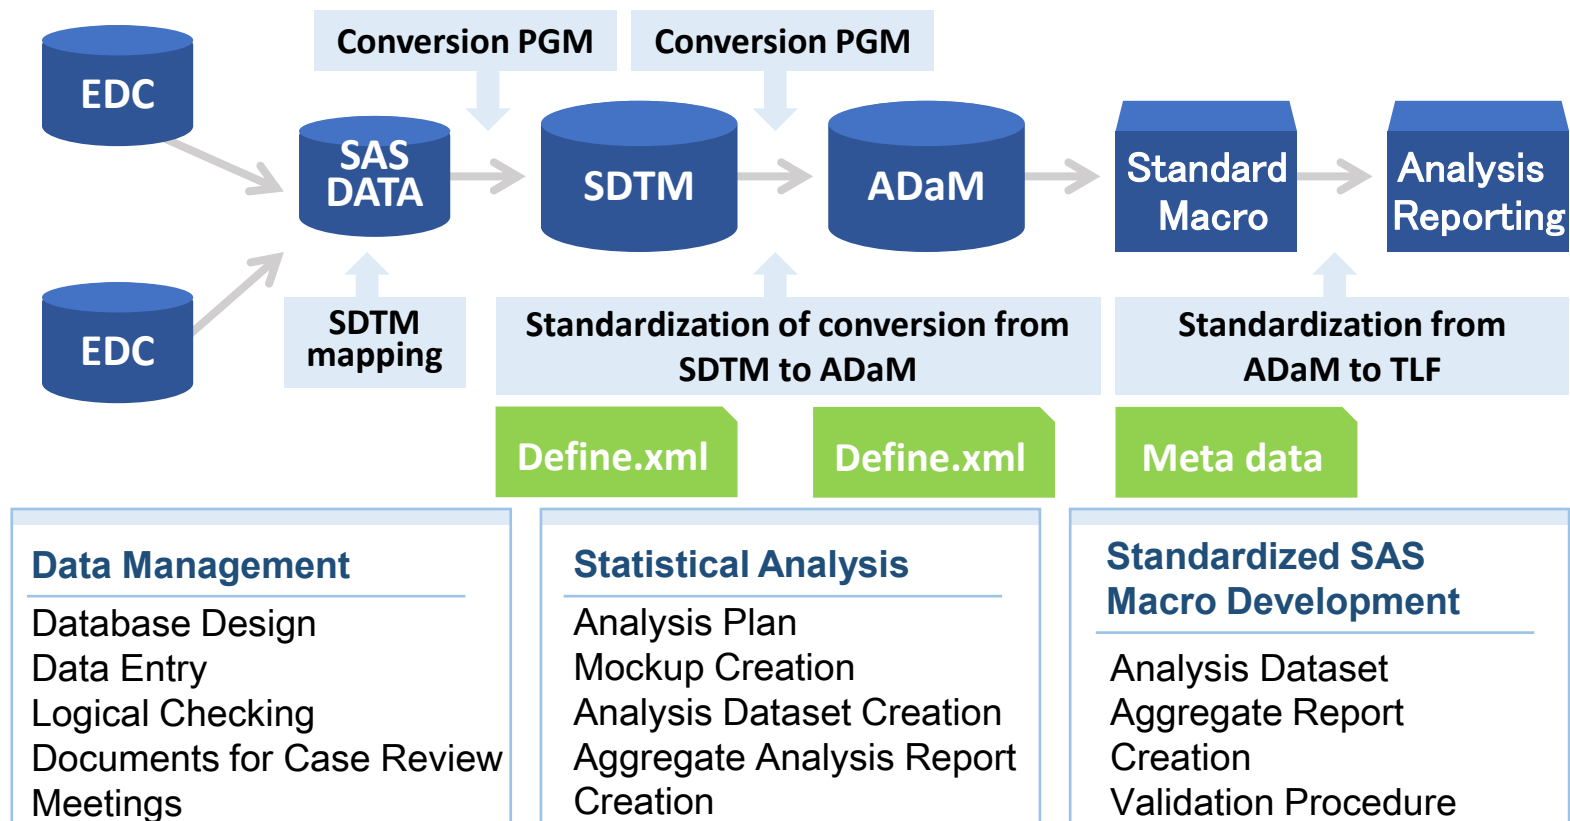

IT Services

Takumi Takumi Macro Series ：Support report creations

Collaborative Support Services

In partnership with CLINICAL STUDY SUPPORT Co., Ltd., we offer a one-stop solution for database research utilizing real-world data—covering research planning, statistical analysis, medical writing, and manuscript submission.

Services – Drug Development

CDISC Standards

Conversion PGM **Conversion PGM**

EDC → SAS DATA → SDTM → ADaM → Standard Macro → Analysis Reporting

EDC → SAS DATA

SDTM mapping

Standardization of conversion from SDTM to ADaM

Standardization from ADaM to TLF

Define.xml   Define.xml   Meta data

Data Management

Services – Packaged Software / Software Distribution

XPT Compare

`Takumi`

A tool for handling non-clinical data. It converts CDISC SEND-format XPORT files to CSV or Excel, allows format and value edits directly in Excel, and maintains an audit trail of all changes.

Stat Preclinica

`Takumi`

A statistical analysis tool with 89 types of statistical analysis and test methods for handling non-clinical data. It features a user-friendly interface, of which data can be input simply by copy & paste from EXCEL.

Services – Packaged Software / Software Distribution

SENDVT

Takumi

A JMP add-in tool that provides mouse-based functionality for processing, statistical analysis, and visualization of continuous variables in CDISC SEND datasets.

Services – Packaged Software / Software Distribution

Takumi Macro Series

Takumi

TMS A series of tools for facilitating the process of creating reports from raw data in pharmaceutical-related operations.

TMS-aCRF Maker : Create Annotated CRF in just 3 steps

TMS-RTF Standard : Standardize the output style of analysis reports in RTF format

TMS-Check Diff : Improve efficiency in reports comparison

Viedoc

Viedoc is an EDC with a track record of achieving more than 700 studies in over 60 countries around the world.

Services – Packaged Software / Software Distribution

nQuery

Enables quick and easy sample size calculation for statistical analysis.

solas

It imputes missing values in 6 ways, processes data and displays merges. It is equipped with multi-imputation method based on the research of Professor Donald B. Rubin, and supports SAS, SPSS, etc. file formats.

Services

IT Solutions

Data Mining × Big Data × System Construction

Extract and utilize necessary information from big data,
Support our clients to develop the future of business

Banking / Finance / Insurance	Manufacturing / Distribution
Information / Communications	Medical / Civil Services / Others

Marketing Analysis

Market Trend Analysis

Anomaly Detection Logic

Operation Data Analysis

Consumer Behavior Analysis

Debt Collection Data Analysis

SAS Installation / System Migration

Demand Forecasting System Development

Mortgage Credit / Revenue Management

Reporting Application Development

Services – IT Solutions

What is best from the user's perspective?

With our strengths in statistical analysis and extensive experience in aggregate analysis of big data, we provide aggregate analysis system to perform data analysis through advanced analysis methods. By analyzing the latest data on market changes with high accuracy, we provide solutions for you to make quick decisions.

Marketing / Market Analysis

System Development

Migration Service

Consulting

Services – IT Solutions

Achievements by Industry

Banking / Finance / Insurance

- Card data DHW construction & data analysis system
- Campaign information aggregation analysis system construction
- Operation model construction system
- DWH analysis system construction
- Marketing analysis system construction
- SAS BI environment construction & DM aggregation analysis system construction
- SAS BI Server related installation
- Data / program migration from SAS V8 to SAS V9
- SAS programming consulting

. . . .

Services – IT Solutions

Achievements by Industry

	Manufacturing / Distribution

- Marketing data analysis system development
- Operation of survey data analysis system operation
- Distribution data analysis system
- Operation of marketing data analysis system
- Sales data DWH construction / aggregation analysis system operation
- SAS performance tuning
- Application / system migration

. . . .

Services – IT Solutions

Achievements by Industry

Information / Communications

- Telemarketing analysis report creation
- DWH marketing analysis system construction

. . . .

Medical / Civil Services / Others

- Operation of insurance information analysis system
- SAS BI Server related installation
- Data / program migration from SAS V8 to SAS V9
- Application / system migration
- SAS programming consulting
- SAS statistical analysis consulting
- Dispatch of SAS training instructors   . . . .
